EKSPONERING TIL FOSSIL ENERGI

Eksponering til fossil energi er opgjort efter EU's definition jf. Disclosuresforordningen (EU-regulering nr. 2019/2088). Definitionen findes i Disclosuresforordningens tilhørende draft RTS (version I), Annex I (11):

'companies active in the fossil fuel sector' means (i) companies that derive any revenues from exploration, mining, extraction, distribution or refining of hard coal and lignite; (ii) companies that derive any revenues from the exploration, extraction, distribution (including transportation, storage and trade) or refining of liquid fossil fuels; and (iii) companies that derive any revenues from exploring and extracting fossil gaseous fuels or from their dedicated distribution (including transportation, storage and trade)

Data for eksponering til fossil energi hentes via databasen MSCI ESG-Manager.

Der anvendes faktoren *Active Fossil Fuel Sector Exposure*.

Faktoren angiver hvorvidt en virksomhed er eksponeret til aktiviteter relateret til fossile brændstoffer, herunder udvinding, behandling, opbevaring og transport af petroleumprodukter, naturgas, termisk samt metallurgisk kul. Der skelnes ikke efter graden af eksponering til førnævnte fossile brændstoffer og der forekommer selskaber i listerne
